From Moria Mountain Central Java-Indonesia

"World Peace Gong" as the only facility to unify mankind in the whole world, came from the village of Plajan-Mlonggo-Jepara, Central Java, Indonesia. The sacred gong owned by Mrs. Musrini is more than 450 years old. She is the seventh generation of gong ownership.

According to the record of the experts, the "World Peace Gong" was made by the prime guardian at the period of Demak Kingdom descendant of the Majapahit Kingdom. As the American continent was still underdeveloped, Majapahit Kingdom had been fastly developed. It had bigger power of intervention, spread over the entire of South East Asia (ASEAN), to the east coast of Africa (Madagaskar and Tanzania in present time). Mrs. Musrini who lived in the village of Plajan at the west side of Moria Mountain, was the generation of the gong maker. Located herself at the west side of Moria Mountain, it was previously used as the sermons facility in the framework of Islamic promulgation to the inner society in the mountainous regions which was still primitive and deeply stuck to animism belief at that time.

Moria mountain in Central Java is the only one that owned extraordinary peculiar charisma. For hundreds of year, it got special attention from the high spiritual figures of the world. Being an analysis subject of scientists, intellectuals, and peace

activists of the whole world. The name of Moria coming from the language of Abraham means the "choice of God". At the south side of Moria Mountain is Kudus regency, the grave of Sunan Muria can be found as one of the members of nine pious leaders who spread Islamic in Java. At the top of north side of the Moria Mountain is found the grave of Begawan Abiyasa, as a prophet of Hindu religion where it's protected by the white tiger at the certain time.

The world figure as winner of "Peace Noble" who became Prime Minister of Israel many times, Mr. Simon Perez mentioned Moria Mountain in Central Java, Indonesia owned extraordinary magic aura power. Mr. Yasser Arafat (President of Palestine), also a noble peace winner said that the Moria Mountain is Allah Selection Mountain to be created as "Peace Mountain".

Both legendary figures coming from Middle East had an opinion that the Moria Mountain in Central Java, Indonesia was twins' brother, and even the elder of Moria Mountain located in Jerusalem, Israel/Palestine. Such mountain is higher and bigger measure structure. According to the history of Samawi religion record, the Moria Mountain in Isreal/Palestine owned highest spiritual aura dimension.

Pioneer of "World Peace Gong" From God-Selected Mountain

Moria Mountain (Israel/Palestine) according to the belief of Samawi religion (Jew, Christian, and Islam) was the first location that God (Allah) manifested himself and met to decree commandment with Prophet of Abraham. Abraham was nicknamed as a father of prophets that had strong personality and very persistent in finding the existence of God, the Creator of the universe. Abraham who stuck to polygamy had two wives, named Sarah and Hadjar. From Sarah he got one child named Iskak, and from another wife had he one child named Ismail. The generation of Iskak got a child named Moses who taught Jewish religion, and Jesus as messenger taught of Christian religion. The generation of Ismail got a child named Mohammad as messenger of Islamic religion.

Historically, located in Moria Mountain came out the first commandment of the God to Abraham

in teaching religion to entire mankind about the One-God doctrine. After Abraham to the next period, Moses received the Ten Commandments. When he got the Ten Commandments, he felt confused to describe to his followers. Then, he went to Moria Mountain. From there, Moses obtained guidelines about the teaching method of the Ten Commandments to his followers. The generation after Moses, the name of David appeared as prophet and king. He received the first commandment from the God to establish a worship house (Synagogue) or the House of God in Moria Mountain. But, due to circumstances, the development of the first worship house done by David had never been completely built. When the son of David named Solomon appointed as prophet and king, he continued to build the worship house in the same location. The first worship house physically completely established was located at Moria Mountain.

In the next generation, a prophet was born named Jesus Christ at the town of Bethlehem (Palestine). Bethlehem coming from the word of Arabic language (baitul means house and lahmin means meat). After being circumcised, Jesus Christ taken by his parents named Jusuf and Maria to the country of Egypt. After being guided and baptized by the prophet of Johannes at the river of Jordan, Jesus Christ received God's message to teach and spread the religion to the people of Israel. The first place selected by Jesus in teaching religion located at the Moria Mountain.

The event that dimensioned Magic-spiritual connected with the existence of Moria Mountain monumentally as a place of mi'raj (ascension journey) of prophet Mohammad directly met with Allah in receiving commandment of obligation to pray five times in one day. The event of mi'raj became pioneer in door-opener against the entire mystery of the universe. The source of science and knowledge that had never finished to dig up by the whole scientists in the world in producing various findings of sophisticate technology. Through mi'raj was disclosed the screen to the whole source of knowledge. In this very huge universe, other than planet earth, could be found millions of planets created by God. The earth occupied by mankind is the only one compared by the millions of planet existed in the entire universe.

From the mi'raj inspiration, came various modern technologies that are at the moment enjoyed by all mankind in the world. Sophisticated technology, such as computer, aircraft, internet, fax machine, record camera etc., are found from the event of mi'raj of prophet Mohammad from Moria Mountain to the elevation of Sindatrumuntaha.

Departed from the historical background as described above, the existence of Moria Mountain, other than receiving predicate as "Peace-Mountain", source of knowledge and soul to unify whole mankind in the surface of the earth. Therefore, the pioneer of the World Peace Gong as a facility that is able to unify and to integrate the whole mankind in the world, coming from Moria Mountain in Central Java, Indonesia.

Why was it not coming from Muria's mountain in Jerusalem-Israel/Palestine ? Because Moria Mountain located in Israel/Palestine, Middle East became a location of dispute against both Abraham's grandsons (Israel/Palestine). Someday, one unit of World Peace Gong will be inaugurated permanently located Moria Mountain in Jerusalem to terminate conflict between Israel and Palestine. And, it is directly realized peace permanently in the whole region of Middle East.

"World Peace Gong" is founded by the International Society become the only "Facility for Brotherhood and Mankind Unification" in the whole earth planet. In its structure, World Peace Gong accommodates whole aspiration and importance of all mankind. In the outer circle, it indicates the flag of all independent countries existed in the world. Colorful flag of all freedom and sovereignty of the countries are well structured on the front circle of the gong. In the display, it seems beautiful, harmony, fascinating, and possesses extraordinary brotherhood nuance. By seeing the row of colorful flag performance from the whole countries at the outer circle of the "World Peace Gong", we assure to get spirit of peace and great deal of happiness.

At the middle circle, there is the writing both in English word of "World Peace Gong" and Indonesian world of "Gong Perdamaian Dunia". The writing and flower are confirmation and identity of the Peace Gong. English word is displayed because it's communication of international language.

Meanwhile, the existence of Indonesian language is to confirm about the primary facility derived from Indonesia. And, the flower is a symbol of beauty, happiness, and peace located in the separation side of both writings. Position of flower remains in two places, both located in left and right sides, possesses meaning of balance symbol.

At the inner circle, it displays ten large religion symbols adhered by the majority of earth planet population. The ten large religions consist of Islam, Hindu, Judaism, Christian, Buddha, Confucius, Tao, Sikh, Shinto and Hindu Bali. A part of the ten large religion mentioned above, there're still many other beliefs and sects adhered by earth society. Since the adherents are not much, they should not include into structure of the "World Peace Gong". It's only technical consideration. About Judaism religion, even though it only owns relative small adherents, their existence spreads over and possesses very significant influence network in the international activities. Therefore, the Judaism religion symbol (Star David) remains in the World Peace Gong.

Prof. Dr. Haryono Suyono was giving a speech at the program of World Peace Gong in India. (photo: Mulyono).

Bali Hindu religion, relatively small adherents, the symbol of Swastika is displayed because the first World Peace Gong was announced by striking the gong in the island of Bali, Indonesia.

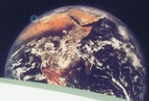

At the top circle, World Peace Gong displays terrestrial globe or earth planet. The earth planet located in the top that represents all living people and stepped in the earth planet. All earth societies are coming from one family (one generation). All human live in this world derived from one family, namely earth family or international citizen. As one family, they should live side by side peacefully, help to one another, work together to protect and to maintain the earth planet. Globalization that

unifies the world is a proof that the humankind is coming from one family. Through globalization, humankind is returned and unified in one unit without the existence of separation line. Program of design contributed by the thought of Hestini SH. The World Peace Gong liquefied lines of ideology, nationality, religion, or separation line in any other formation.

World Peace Gong born into the world as the real response against the world globalization. The presentation of world peace gong returns mankind of the whole world into one family, namely "Earth Family".

BUILDING SOLIDARITY AND WORLD PEACE

The placement of the Gong for World Peace at various places around the world is an effort deserving our high enthusiasm. Furthermore the Gong for World Peace is the fruit of Indonesian youth who are concerned with prevailing irresponsible attitudes and behavior disregarding human values which we have held high. The symbolic thought and idea manifesting those concerns as the World Peace Gong is inspired by the devastating bomb in the midst of tranquility. The explosion of the bomb has as if it has shaken moral foundations which we never thought possible in the past. All have condemned the explosion, and expressed hope that that tragedy will never recur. That explosion should be the first and the last. It is for that express reason that the rhythm of war in the ancient oriental shadow play should be terminated by the reverberating sound of the gong. It is therefore that the work of art as manifested in the sound of the "Gong" is interpreted as the echo of the explosion ending the rhythm and sounds of war.

Moreover, the sound of the Gong in times of peace, should incite togetherness such that with fresh and refreshed heart we can solve common problems, as the sound of the Gong at the beginning of joyous events could signify. The sound of the Gong signals the beginning of a profound event with noble ideals. The sound of the Gong accompanied by ovations signifies the happy beginning of long awaited effort. Following the striking of the gong, all deliberations and activities will be conducted in peace, with hopes of resultant happiness and prosperity for all. The reverberations of the Gong accompanied by ovations symbolizes that all will proceed peacefully.

Similar to the first Asia and Africa Conference in Bandung which sparked the increasing number of independent countries, we are all hopeful that the World Peace Gong will remind human-kind that we all are brethren and we all love peace. Therefore we are thankful that the ideals founded on noble philosophical tenets is finally gaining the eyes of the world. As a peace loving nation we are grateful for the opportunity to take part in inviting all concerned on the true meaning of peace to our descendants. We should be thankful to all our peace-loving brethren from all corners of the world, be they from the advanced societies or from the developing countries, who have spontaneously offered their contributions to support this peace movement for all mankind.

Peace is beautiful, peace gives opportunities for all to enhance their welfare status. Peace gives the opportunity to every human being to share common understanding, and to make brotherhood and togetherness the strong bond to face future challenges and strive for progress, resulting in a just and harmonious civilization. Let us give our support to that noble cause and participate actively in the dissemination of the World Peace Gong to all corners of the world. Whenever the Gong echoes, we shall be grateful for the opportunity to take part in the spread of lasting peace, brotherhood and prosperity.

MINISTER FOR CULTURE AND TOURISM
OF THE REPUBLIC OF INDONESIA

It is with great pleasure that I welcome the special edition of "World Peace Gong". I note with sincere appreciation that a gigantic World Peace Gong is now under construction by Balinese artists and will be placed in the World Peace Village of 100 ha in North Bali as an impressive landmark.

Prime Minister MESSAGE

The Government of India very gratefully accepts the 'World Peace Gong' from the World Peace Committee - Indonesia. On behalf of the Government and the People of India, I would like to convey my sincere thanks to you and to the World Peace Committee- Indonesia for this gracious offer.

The first satyagraha launched by Mahatma Gandhi on 11th September, 1906 was the first movement in the history of mankind for securing freedom and justice on the basis of non-violence. Its significance endures beyond time and space. Based on the strength and solidarity of people professing diverse faiths it teaches us to foster harmony, understanding and tolerance to defeat forces represented by fanaticism and terrorism. The first satyagraha was the first step in India's non-violent struggle for independence and a major step to free the world from exploitation. In the context of India's emergence as a major economic player the first satyagraha has immense relevance. It was launched to fight against discriminatory practices imposed on Indians who did better in the field of trade and commerce than other settlers. While taking pride in our economic achievements let us restore the spiritual basis of our material progress. Let us all be inspired by the ideals of the first Satyagraha and build the India of Mahatma Gandhi's dreams.

On this occasion, I have great pleasure in extending my greetings and good wishes to all those associated with Gandhi Smriti for the success of the celebrations.
